Engineering the Future

Learning • Innovation • Leadership • Excellence

“Building Strong Foundations for Tomorrow's Engineers”

The First Year Engineering Department of Don Bosco Institute of Technology plays a vital role in shaping the academic, professional, and ethical foundations of future engineers. During the Academic Year 2025–2026, the Department of Basic Science & Humanities successfully conducted several academic, technical, co-curricular, and student development activities aligned with the vision of holistic engineering education. Students actively participated in orientation programmes, project exhibitions, laboratory learning, mentoring initiatives, communication skill development, innovation competitions, outbound experiential learning, and value-added programmes. These initiatives encouraged curiosity, teamwork, creativity, leadership, and professional excellence.

This newsletter captures the significant milestones, achievements, and memorable moments of the department throughout the academic year. It celebrates the dedication of students, faculty members, staff, parents, and all stakeholders who contributed to making the year meaningful and successful.

Principal's Message

"Education is the foundation upon which innovation and leadership are built"

It gives me immense pleasure to present the **First Year Engineering Newsletter 2025–2026**, which showcases the achievements, initiatives, and vibrant academic culture of the Department of Basic Science & Humanities.

The first year of engineering education is a transformative phase where students acquire not only scientific and technical knowledge but also develop critical thinking, communication skills, ethical values, and professional attitudes. At Don Bosco Institute of Technology, we strive to provide an educational environment that nurtures intellectual curiosity, innovation, and holistic development.

Throughout the academic year, our students actively participated in orientation programmes, laboratory learning, project exhibitions, innovation challenges, mentoring activities, outreach programmes, and various co-curricular initiatives. These experiences have helped them strengthen their technical competence while developing teamwork, leadership, and social responsibility.

The achievements highlighted in this newsletter are the result of the sincere efforts of our dedicated faculty members, enthusiastic students, supportive parents, and committed staff. I congratulate everyone on their accomplishments and encourage our students to continue pursuing excellence with integrity, creativity, and perseverance.

I extend my best wishes to all students for a successful academic journey and a bright professional future.

Dr. Sudhakar Mande

From the Head of Department's Desk

“Nurturing Future Engineers Through Excellence and Innovation”

Dear Students, Parents, Faculty Members, and Well-wishers,

It gives me immense pleasure to present the First Year Engineering Newsletter for the **Academic Year 2025–2026**. This newsletter reflects the vibrant academic culture, innovative spirit, and holistic development initiatives undertaken by the Department of Basic Science & Humanities.

The first year of engineering serves as the cornerstone of every student's professional journey. It is during this period that students acquire the scientific knowledge, analytical thinking, communication skills, ethical values, and professional attitude essential for becoming successful engineers.

Our department strives to create a learner-centric environment where every student is encouraged to explore, innovate, collaborate, and excel.

Throughout the academic year, the department organized several academic and co-curricular activities including the Orientation Programme, **INNOSPARK 2026** Project Exhibition, Parent–Teacher Meetings, Outbound Learning Programme, expert lectures, mentoring sessions, communication skill workshops, and value-added programmes. These initiatives were carefully planned to bridge the gap between classroom learning and professional practice while fostering teamwork, creativity, leadership, and social responsibility.

Orientation Programme 2025

“A New Beginning for Future Engineers”

On 13 September 2025, the Department of Basic Science & Humanities welcomed 250 first-year students and their parents to Mondini Hall for the FE Orientation Programme 2025–26. The event began with a ceremonial lamp-lighting by Fr. Anthony Pinto, followed by an institutional introduction by Fr. Charles and a welcome address by Principal Dr. Sudharkar Mande.

The keynote session by Dr. Satyanarayana Bheesette highlighted the importance of discipline, innovation, teamwork, and academic excellence. Students were also introduced to the curriculum, examinations, and various campus clubs.

The programme concluded with insightful industry talks on AI and career opportunities, followed by vibrant cultural performances by the Dance, Marathi, and Music Clubs, leaving students inspired as they embarked on their engineering journey.

Lighting the lamp to inaugurate FE Orientation 2025-26

Every successful engineer begins with a strong foundation.

Speakers for the event

Programme Highlights

- Welcome of students & parents
- Academic regulations & exam system
- Outcome-Based Education (OBE) intro
- Student mentoring system
- Campus & lab facility tour
- Anti-ragging awareness
- Interactive Q&A

Academic Excellence

“Building strong foundations for engineering success”

The Department of Basic Science & Humanities remains committed to providing a strong academic foundation that prepares students for the challenges of engineering education. Faculty members adopted innovative teaching practices, learner-centric methodologies, and continuous assessment strategies to ensure every student developed a sound understanding of engineering fundamentals.

Academic excellence was achieved through classroom teaching, laboratory-based learning, tutorials, mentoring, project work, and continuous internal assessment. Students actively participated in practical sessions, assignments, presentations, and collaborative learning activities that strengthened their analytical and problem-solving abilities. The department also emphasized communication skills, ethical values, teamwork, and professional development — preparing students not only for university examinations but also for future engineering careers.

Excellence is not an achievement; it is a continuous journey of learning, innovation, and perseverance."

Outcome-Based Education

Student-centred learning

Continuous Assessment

Regular progress tracking

Lab-Based Learning

Stronger practical skills

Mentoring System

Learn → Explore → Innovate → Collaborate → Excel

Academic Performance

“Celebrating a year of academic growth”

Academic performance is one of the strongest indicators of the department's commitment to quality education. During the academic year, students demonstrated remarkable dedication, enthusiasm, and perseverance, resulting in commendable semester results across all divisions.

The department's structured mentoring system, regular tutorial sessions, continuous assessment, and personalized academic guidance contributed significantly to improving student performance.

The department proudly recognizes students who secured outstanding SGPA and CGPA, reflecting hard work, consistency, and the pursuit of academic excellence.

Academic Success Factors

- Regular attendance
- Effective mentoring
- Continuous Internal Assessment
- Laboratory-based learning
- Faculty guidance
- Collaborative learning
- Time management
- Consistent study habits

Student Success Formula

Attend Regularly → Learn
Consistently → Practice Daily
→ Ask Questions → Excel
Confidently

Success is the result of consistent effort, disciplined learning, and the courage to overcome challenges."

Student Art Gallery

"Where Young Minds Paint the Future"

The Creative Visual Art (LLC) course fosters creativity, artistic expression, and design skills through a blend of traditional and modern art practices. Students learn techniques such as charcoal painting, chalk art, mandala art, sketching, **Lipan clay mural art**, eco-friendly crafts, and digital design using Canva and Blender.

The course promotes sustainability, cultural appreciation, and creative problem-solving by integrating indigenous art forms with environmentally responsible practices. Through hands-on activities, self-learning, and portfolio development, students develop technical skills, confidence, and a deeper appreciation for creativity, innovation, and lifelong learning.

Where clay and mirrors bring tradition to life

Creativity takes shape, one stroke at a time. Lines that speak, patterns that inspire

- 📌 Successfully Completed (Elite Silver)NPTEL Online Certification course on Constitutional law and Public administration-(Jan-April)-2026
- 🍀 Received Certificate Of Appreciation In recognition of the contribution as a Reviewer for the "International Conference on Emerging Technologies for Sustainable Development (ICETS 2025)" organized by K J Somaiya Institute of Technology, Mumbai, funded by the Indian Society for Technical Education (ISTE), held on June 26–27, 2025.
- 🍀 Invited by the Greater Bombay Science Teachers' Association (GBSTA) to serve as an Evaluator for the Action Research segment of the Dr. Homi Bhabha Balvaidnyanik Competition 2026, held at Vidyalkar Polytechnic, Mumbai, on 15 March 2026.

INNOSPARK 2026

"Igniting Innovation – Where Ideas Become Reality"

Innovation is the driving force behind technological advancement, and INNOSPARK 2026 provided the perfect platform for First

Year Engineering students to transform their ideas into practical engineering solutions.

Organized by the Department of Basic Science & Humanities, the exhibition

encouraged students to apply classroom knowledge to real-world challenges through creativity, teamwork, and problem-solving.

The exhibition witnessed enthusiastic participation from students representing various engineering disciplines. Working in teams under the guidance of faculty mentors, students designed and developed innovative models addressing themes such as Artificial Intelligence, Internet of Things (IoT), Renewable Energy, Smart Cities, Sustainable Technologies, Robotics, Healthcare, Environmental Conservation, and Automation. Each project reflected a strong understanding of engineering fundamentals combined with originality and innovation.

Dignitaries unveiling the official INNOSPARK 2026 booklet during the award ceremony.

INNOSPARK 2026 was not merely a project exhibition but a celebration of curiosity, critical thinking, and collaborative learning. Faculty members, industry experts, alumni, and parents interacted with the students, appreciating their creativity and encouraging them to pursue research and innovation. The event also helped students enhance their technical communication, presentation, and teamwork skills while developing confidence in explaining their ideas to a wider audience.

The exhibition reaffirmed the institute's commitment to promoting experiential learning and innovation-driven education, inspiring students to become future-ready engineers capable of addressing society's evolving technological needs.

The ceremony commenced with the traditional lighting of the lamp.

“

"Every innovation begins with a question, grows through curiosity, and succeeds through perseverance."

Innovation Gallery

“Showcasing Tomorrow's Innovators”

The exhibition showcased the remarkable creativity and technical aptitude of **First Year Engineering students**. Each project reflected the students' ability to identify practical problems, develop innovative solutions, and **effectively communicate** their ideas. The event fostered a spirit of healthy competition while encouraging interdisciplinary collaboration and experiential learning.

Major Project Themes

Artificial Intelligence | Internet of Things (IoT) | Renewable Energy | Smart Cities | Robotics
Sustainable Technologies | Environmental Engineering | Healthcare Solutions | Automation
Smart Agriculture

Parent's Teachers Meeting

"The mentoring system and regular interaction with faculty members have helped our child adapt confidently to Education."

Vision:

We nurture and lay a strong foundation for exploring and experimenting to build a spirit of learning. We inculcate human values and resourcefulness that engages our students in solving societal problems in a sustainable way.

Mission:

- We will provide students with a conducive learning environment to:
- Help them cope up with the engineering curriculum imbibing the Don Bosco values of integrity, reason, and compassion.
- Instill in them an innovative and inclusive mode of thinking, creating a strong foundation for achieving technical excellence and a professional attitude.
- Equip them with the confidence and prepare

Objectives of the PTM:

- Strengthen parent-faculty interaction.
- Discuss students' academic progress and attendance
- Address learning difficulties and personal concerns.
- Encourage active parental involvement in student development.
- Collect valuable suggestions for continuous improvement.

Parents Satisfaction

- Academic Progress
- Internal Exams
- Academic Guidance
- Teaching Effectiveness
- Laboratory Sessions

Outbound & Value Added Programme

“Learning Beyond the Classroom”

As part of the Liberal Learning Course's Social Service Responsibility component, DBIT's Outreach Cell organized an Outbound Programme at Don Bosco Yuva Sanstha, Karjat — run across two batches in April 2026, with 60-70 first-year students and two accompanying faculty per batch.

Students took on trust-building games, outbound tasks like the A-frame and balancing pipe, team sports, and a campfire cultural night on Day 1, followed by trekking and a group reflection session on Day 2 — connecting outdoor challenges to lessons in leadership, discipline, and environmental awareness.

Team exercises encouraged cooperation, communication, and leadership among participants from different divisions.

Camp group photograph

Programme Objectives: Leadership development, teamwork and collaboration, communication and interpersonal skills, environmental awareness, and confidence in decision-making.

Major Activities: Team-building exercises, adventure games, trekking and nature walks, problem-solving tasks, reflection sessions, and cultural interaction.

Student Learning Outcomes: Improved teamwork and leadership, stronger communication and interpersonal skills, greater self-confidence, better decision-making, and increased environmental awareness.

Trekking through nature

Student Experience

“The outbound programme taught us the value of teamwork, trust, and leadership in a way that no classroom session could. It was an unforgettable learning experience.”

Empowering Students Beyond the Classroom

“A New Beginning for Future Engineers”

The Department of Basic Science & Humanities firmly believes that engineering education should nurture not only technical competence but also communication skills, leadership qualities, creativity, and social responsibility. Throughout the academic year, a variety of student development programmes were organized to encourage holistic growth and prepare students for professional challenges.

Students actively participated in expert lectures, communication skills workshops, technical seminars, innovation activities,

sports, cultural programmes, NSS initiatives, and outreach events. These activities provided opportunities to enhance interpersonal skills, teamwork, critical thinking, and professional confidence.

Faculty members continuously encouraged students to participate in co-curricular and extracurricular activities, helping them discover their talents and build a well-rounded personality. Such initiatives have played a significant role in developing future engineers who are technically competent, socially responsible, and professionally confident.

Major Activities

Technical Development

- Expert Lectures
- Technical Seminars
- Laboratory Demonstrations
- Innovation Activities
- Project-Based Learning

Project Exhibition 2026

Professional Development

- Professional Communication Skills
- Presentation Skills
- Group Discussions
- Team Building
- Leadership Activities

Co-Curricular Activities

- Cultural Events
- Sports Competitions
- NSS Programmes
- Community Outreach
- Student Club Activities

Outcomes Students developed:

Student Reflection

"Participating in departmental activities helped us become more confident, collaborative, and prepared for future engineering challenges."

Creating Memories, Building Friendships

College life is a unique blend of learning, exploration, and personal growth. For First Year Engineering students, every classroom session, laboratory experiment, project exhibition, sports event, cultural celebration, and mentoring interaction contributed to a memorable learning experience.

The department fostered an environment where students felt encouraged to express their ideas, collaborate with peers, and participate actively in campus activities. Through mentorship, teamwork, and shared experiences, students developed lasting friendships while strengthening their academic and professional skills.

The Salesian philosophy of education—centered on reason, religion, and loving kindness—continued to guide the department's approach to student development. This nurturing environment enabled students to grow into responsible, disciplined, and compassionate individuals ready to contribute positively to society.

Campus Highlights

Friendly and inclusive learning environment.

Modern laboratories and classrooms.

Active mentoring system.

Technical and cultural festivals.

Sports and wellness initiatives.

Innovation and creativity.

Community engagement.

Continuing the Journey of Excellence

As another successful academic year comes to a close, the Department of Basic Science & Humanities looks forward to new opportunities for learning, innovation, and growth. Building on the achievements of 2025–2026, the department remains committed to providing a transformative educational experience that prepares students to become competent engineers and responsible global citizens.

The upcoming academic year will feature a range of academic, technical, and co-curricular initiatives aimed at strengthening students' professional competencies, encouraging innovation, and fostering holistic development.

Upcoming Initiatives

- Expert Lecture Series
- Technical Workshops
- Industrial Visits
- Innovation Competitions
- Project Exhibition
- NSS Activities
- Parent–Teacher Meetings
- Communication Skills Programmes
- Student Club Activities
- Community Outreach
